ABOUT OBJ'S TECHNOLOGIES

OBJ has developed a number of physical enhancement technologies based on the interactions between ingredient molecules and weak atomic forces. These influence the movement and penetration through the skin of drugs, active ingredients and formulations at the molecular level.

OBJ has significant expertise in the science of magnetic fields:

The first of OBJ's magnetic technologies was the Magnetic Microarray. Complex 3-D magnetic fields produced by low-cost microarrays film was licensed in 2014 and incorporated into the first products in the same year.

The second magnetic technology, the programmable array technology, employs powered electromagnetic fields that could be altered to suit individual consumer's skincare needs. This was licensed for skincare applications in 2020.

The third magnetic technology uses magnetic fields to alter the wettability of a surface to allow enhanced contact between liquid and solids. Magneto-Wetting is being employed in the Company's current developments in haircare, skincare and surface hygiene, in conjunction with OBJ's recently developed Ultrasonic Misting technology. International patents have been filed.

FORWARD-LOOKING STATEMENTS

This announcement contains certain "forward-looking statements" concerning OBJ. Where OBJ expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis.
